EDUCATION

- BTech – CSBS, St Vincent Pallotti College, Nagpur-2027 |8.85
- Class XII (HSC), G.H. Raisoni, Nagpur-2023 |67%
- Class X (State Board), Saraswati Vidyalaya, Nagpur-2021 |85%

WORK EXPERIENCE

House Of Ruvi | Intern | Word press - CMS **April'26 - Now**

- Managed 100+ product listings and promotional content through WordPress CMS.
- Automated product uploads, reducing repetitive catalog management effort.
- Optimized product presentation and promotional content to improve customer engagement.

Golden-Kulcha & Co | Intern | Web Developer **March'26 - May'26**

- Developed a full-stack food ordering system covering 3 core workflows - menu browsing, order placement and order tracking.
- Built a feedback workflow connecting customer submissions → admin review reducing manual follow-up across the platform.
- Integrated a unified operational system, linking inventory movement with sales transactions and billing records for operational tracking.

Ira - Agro Tech Pvt. Ltd | Intern | Enterprise Resource Planning **June'25 - July'25**

- Supported ERP planning and client coordination, translating operational requirements into structured Excel-based workflows.
- Managed and maintained records and reports, to support accurate tracking and decision-making.
- Assisted in understanding client requirements coordinating across procurement, sales and billing processes.

PROJECTS

Warehouse Management System | Fast API / MongoDB / React + Vite

- End-to-end warehouse platform spanning 5+ workflows—inventory, orders, receiving, picking and dispatch—with dedicated role specific-access.
- Integrated 10+ endpoints with database and AI/MCP tooling to query operations, surface insights and automate routine warehouse actions.
- Delivered a deployed application with 3 workspaces, secure authentication, analytics and responsive interfaces through Vercel and Render.

Hospital Management System | FastAPI / PostgreSQL / React + Vite

- Developed an AI-assisted booking workflow with 1 conversational interface, reducing manual appointment-booking steps by ~40% through automated assistance.
- Integrated MCP with Telegram across 5 hospital workflows, enabling patients/users to access booking and hospital services directly through a conversational channel.
- Built a CLI-based readiness system for hospital owners covering operational checks for hospital preparedness.

CryoW3times | Next.JS / MongoDB / React + Typescript

- Developed backend functionality for a real-time cryptocurrency news aggregator using Next.js API Routes, MongoDB and Prisma.
- Built API-driven pipelines for news ingestion, processing and persistence, connecting external market data with structured database storage and user-facing content.
- Developed authentication and content-management features with Next Auth, enabling secure sessions and controlled publishing across the application.

TECHNICAL SKILLS

- **Languages**: C, C++, Python.
- **Web Development**: React, Vite, Fast API, REST API.
- **DevOps & Cloud**: Git, GitHub, Docker, AWS, Google Cloud, Vercel, Render, Shell Scripting, Ansible.
- **Databases**: PostgreSQL, MongoDB.
- **Tools & Platforms:** Microsoft Excel, Power BI, Word.
- **Core Concepts**: Data Structures & Algorithms (DSA) in C++, Web Development Fundamentals.

CERTIFICATIONS AND ACHIEVEMENTS

- GEN-Ai Bootcamp/Hackathon | Winners | Eigi.AI
- Envision | Inter-College Hackathon-Nagpur | Top 10 among 1000 applicants.
- Ministry Of Electronics & Information Technology | DII Internship | shortlisted (3/4 rounds)
- AWS-Solution Architect | Geeks For Geeks | Exam-Based.
